RE: QUESTIONS 1-6: HAVE RESPONDENT USE ROSTER TO LIST PERSONS IDENTIFIED IN THIS SECTION

Now we are going to ask you some questions about your relationships with other people. We will begin by identifying some of the people you interact with on a regular basis. You may refer to these people in any way you want; for example, you may use just their first names or nicknames. We are not interested in the identities of these persons, we just need to have some way to refer to them so that when we ask you some follow-up questions we both know whom we are talking about.

Q1. From time to time, most people discuss things that are important to them with others. For example, these may include good or bad things that happen to you, problems you are having, or important concerns you may have. Looking back over the last 12 months, who are the people with whom you most often discussed things that were important to you? Please list these people in Section A of your roster.

☐ REFUSED (SKIP TO NOTES)

Please take a sip of water for an upcoming measure.

Now we are going to ask you to smell some scented pens which are common odors in everyday life. I have several pens here that smell the same, but some smell stronger than others. Some have no smell at all.

I'm going to place a pen near your nose like this (DEMONSTRATE ON YOURSELF) and ask you a question about what you smell. I will then ask you to use the computer to rate the strength of the smell. The left side is where you would mark if there is no smell at all since some pens have no smell. The right side is where you would mark if it smells very strong.

For this measure it is very important to not have discussion. Please do not think too long. The best way to answer is to just let your answer come out.
