Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR #20541

*National Social Life, Health, and Aging Project (NSHAP): Round 1, [United States],
2005 – 2006*

DS6: Medications Data, Restricted-Use

- 1) Restricted-Use/Confidentiality:** Users interested in obtaining the restricted-use data from NACDA must request and complete the NSHAP Restricted Data Use Agreement form. Users can download this form from the download page associated with this dataset. Completed forms with original signature(s) should be emailed to icpsr-nacda@umich.edu.
- 2) Related Data Collections:** Please refer to the related data collection [ICPSR 34921](#), National Social Life, Health, and Aging Project (NSHAP): Round 2 and Partner Data Collection, [United States], 2010-2011, as well as [ICPSR 36873](#), National Social Life, Health, and Aging Project (NSHAP): Round 3 and COVID-19 Study, [United States], 2015-2016, 2020-2021 for further information regarding the NSHAP project.
- 3) Stata Notes:** Stata notes have been added by the P.I. in the original Stata files within the zip package in Dataset 9: P.I. NSHAP Wave 1 Restricted-Use Stata Data Files. These notes provide additional information for variables across the data collection. For example, any time a question was asked in the leave-behind questionnaire for either some or all of the respondents, a note indicating this has been attached to the corresponding variable. Users may reference the zip package found in Part 8 and access notes attached to variables by entering the command “. notes” within the Stata command syntax for a particular data file.
- 4) Missing Data/Documentation:**
 - a)** Variables for NSHAP Module D: Orasure are not included in the data.
 - b)** Variables for Green Pen #1 – Green Pen #5 and Red Pen #1 – Red Pen #5 in the NSHAP Biomarker Core: Smell section are not included in the data.

5) Additional Data Files: This collection is being released in nine parts: Parts 1 through 7 contain the ICPSR-processed files; Part 8 contains the public-use original Stata data files provided by the P.I. in a zip file package. Part 9 contains the restricted-use original Stata data files with extended and nonextended missing values provided by the P.I. in a zip file package.

6) Additional Information:

- a) Users should note that the National Social Life, Health, and Aging Project (NSHAP) Release Manual applies to all NSHAP Waves (ICPSR 20541, 34921, and 36873) found within the P.I. Documentation in the ICPSR Codebook.
- b) Please note that the NSHAP Release Manual found within the P.I. Documentation in the ICPSR Codebook refers to a README file in the introduction of Chapter 2: Multum Drug Category Hierarchy that is not being released by ICPSR.
- c) Users should refer to the P.I. Wave 1 In-Person Interview & Leave Behind Questionnaire for further information and an in-depth description of the individual interview paths used throughout the data.
- d) Please visit the [NORC at the University of Chicago](#) website for more information on this collection, including information on sampling and weights.
- e) ICPSR has included two Excel crosswalk documents which detail the variables present across the waves of NSHAP, as well as which variables are included in the public and restricted-use versions of each wave.

ICPSR 20541

National Social Life, Health, and Aging Project (NSHAP): Round 1, [United States], 2005-2006

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
